

Week 7 Postgame Recap

Regular-season finale — Maple Tree vs No Dice — Wed, June 3, 2026 — Boncosky Yellow

Week 7 was the regular-season finale, and Maple Tree closed the book the way most of the season's chapters read: a competitive game it could not quite finish, followed by a game that finished it. No Dice swept the doubleheader 11-9 and 17-5, the regular season ends at 2-10, and the franchise is now 0-10 all-time against No Dice. But here is the part that matters: **the regular season is over, and the playoffs do not care about it.** Maple Tree is in. Single elimination. Records reset to zero. And the Round 1 opponent is not the team that just swept this roster — it is a Bullseyes club Maple Tree already beat once this spring.

Week 7 Scoreboard

Game	Time	Result	MT	No Dice	Notes
1	6:30 PM	L	9	11	Closest game ever vs No Dice
2	7:30 PM	L	5	17	16-2 No Dice over the last 4 innings

- Team line: 14 runs, 29 hits, 2 home runs across 68 plate appearances
- All-time vs No Dice after Week 7: **0-10**

Game 1 Recap

The opener was the most genuinely competitive game Maple Tree has played against No Dice in franchise history. Maple Tree put up five in the first, traded the rest of the way, finished with 18 hits and 9 runs, and lost by two — an 11-9 final that, against this opponent, qualifies as a moral near-miss. The team had never previously come within eight runs of No Dice; this time it came within two. Glove (3-for-4), JJ (3-for-3, double), and Tristan (3-for-4) all had three-hit games, and Tim added a double and three RBI. The margin came down to the usual culprit — No Dice scored in five of their first six innings and Maple Tree never got the one clean defensive frame that flips a two-run loss into a win.

Game 2 Recap

The nightcap reverted to form. No Dice scored four in the fourth, four in the fifth, four in the sixth, and four in the seventh — sixteen in the back half — and won 17-5. Maple Tree managed 11 hits and five runs and was outscored 16-2 over the final four innings. The bright spots were brief: Kives went 2-for-3 with a home run and **four RBI**, Tim added two more doubles to cap a huge night, Tristan hit his 11th homer, and Glove tripled. Enough offense to be respectable, not enough run prevention to be competitive — the season in miniature.

Week MVP

Tim is the Week 7 MVP, and it is not close. Across the doubleheader he went **5-for-6 with three doubles, eight total bases, three runs, and three RBI** — the loudest two-game line on the team and a fitting cap to a strong second half. Kives earns runner-up for the four-RBI nightcap.

Records and Milestones

Tim broke the single-season doubles record. His three doubles in Week 7 pushed him to **10 doubles on the season**, surpassing the previous franchise mark of 8 (shared by Tristan in 2021 & 2022 and Porter in 2021). It is the only single-season counting record currently held by a 2026 hitter — and because the team counts playoff games toward records, **the mark is not final**. Tim can keep padding it in the bracket.

The regular season's final milestone ledger:

- **Tim** crossed **50 career runs** (and set the new single-season doubles record).
- **Kives** crossed **200 career plate appearances** (now 204).
- **JJ** crossed **250 career plate appearances** (now 251).
- **Corey** crossed **200 career at bats**.
- **Jason** crossed **150 career at bats**.
- **Joel** and **Joey** both crossed **100 career plate appearances**.

Because playoff games count, none of the single-season leaderboards are locked. The closest remaining chases: Tristan is four home runs shy of his own 15-HR single-season record, and JJ is four walks shy of the single-season walk record — long shots in a single-elimination run, but live on paper.

Final Regular-Season Standings (= Playoff Seeds)

Seed	Team	W	L
1	No Dice	11	1
2	cacheouts	9	3
3	Bullseyes	7	5
4	Wasted Talent	6	6
5	Soft Ballz	5	7
6	Maple Tree	2	10
7	Wasted Potential	2	10

Maple Tree backed into the 6 seed over Wasted Potential on the tiebreak — both finished 2-10. Around the league: cacheouts hammered Soft Ballz twice (23-6, 17-2) to lock the 2 seed, Bullseyes and Wasted Talent split, and No Dice finished 11-1 as the runaway top seed.

The Playoff Bracket

Single elimination — all games Wednesday, June 10 at Boncosky. Maple Tree's path is highlighted in blue.

Maple Tree's path: Round 1 is **Game 3 — #6 Maple Tree vs #3 Bullseyes, 7:30 PM at Boncosky Red**. Win, and the team advances to **Game 5 (8:30, Red)** against the winner of cacheouts vs Wasted Potential. Win that, and it is the **Game 6 final at 9:30**.

Why This Is Not No Dice

Here is the encouraging part. Maple Tree just went 0-2 against a No Dice team it has never beaten in 10 tries. The Round 1 opponent is **not that team**. Maple Tree split with **Bullseyes** this season — winning the 25-24 Week 2 slugfest and losing the other meeting 15-5. Bullseyes finished 7-5, a good-but-beatable club, and exactly the kind of opponent the season-long data says Maple Tree can outscore on a good offensive night. The team's whole problem all year was the back half of doubleheaders and run prevention. The playoffs are **single games** — no nightcap collapse to worry about. The analytics said it months ago: this team wins when it scores 15. Against Bullseyes, that number is reachable. Against No Dice it never was.

Final Regular-Season Team Stats

Through 12 games, Maple Tree scored 140 runs and allowed 204 — **11.7 scored, 17.0 allowed per game** — and posted a .489/.518/.811 slash for a **1.329 team OPS** with 29 home runs. The story never changed: a top-of-the-division offense dragged underwater by bottom-of-the-division run prevention. The 2-10 record reflects the defense, not the bats. The bats are why there is still a season to play.

Final Spring 2026 Player Stats

Sorted by OPS. Team line in bold. Records and stats remain open — playoff games count.

#	Player	G	PA	AB	H	HR	R	RBI	BB	TB	AVG	OBP	SLG	OPS	wRC+
1	Tristan	12	41	37	24	11	23	26	3	59	.649	.675	1.595	2.270	167
2	Tim	12	41	39	24	4	16	18	1	46	.615	.625	1.179	1.804	137
3	Glove	12	40	39	23	3	18	21	1	41	.590	.600	1.051	1.651	133
4	Kives	12	40	40	21	5	16	22	0	43	.525	.525	1.075	1.600	126
5	JJ	12	42	37	18	2	16	6	5	29	.486	.548	.784	1.331	98
6	Joel	10	30	25	11	3	11	12	4	20	.440	.517	.800	1.317	91
7	Corey	12	34	31	15	0	8	7	3	20	.484	.529	.645	1.175	91
8	Slomka	6	18	18	9	0	6	3	0	10	.500	.500	.556	1.056	85
9	Porter	8	25	24	12	0	5	7	1	12	.500	.520	.500	1.020	72
10	Walsh	12	35	33	14	0	5	10	2	16	.424	.457	.485	.942	70
11	Duff	12	34	30	10	1	8	5	4	14	.333	.412	.467	.878	65
12	Jason	9	25	25	9	0	7	3	0	9	.360	.360	.360	.720	52
13	Joey	10	24	23	6	0	1	4	0	6	.261	.261	.261	.522	35
Team		12	429	401	196	29	140	144	24	325	.489	.518	.811	1.329	100

wRC+ is indexed so 100 = team average; it weights how a hitter actually produces runs (linear weights), so it reorders the card slightly versus OPS. JJ's elite on-base but lighter slug lands him right at team-average run creation; Tristan's 167 means he created 67% more runs per plate appearance than the team norm.
